

# Safety Performer:

## Gain Control of your Critical Safety Events as They Occur

Safety Performer provides your company with near real-time notifications of new critical events. Engagement between your managers and drivers are prompted based on your own custom risk profile.

Safety has always been a source of serious concern within the trucking community, but has now evolved into one of the industry's most critical issues as it seeks to comply with tough new federal programs aimed at reducing crashes and improving safety records. In this new world of heightened scrutiny, detailed, near real-time monitoring is an absolute necessity and significantly factors into each and every business decision you make.

Safety Performer, by Transportation Performance, Inc, is an integrated software performance solution designed to help carriers better manage compliance, safety and accountability on the highway in near real-time. This powerful software gives you a snapshot of what's happening on the road in real-time thereby improving efficiency, boosting safety and cutting costs.

### Safety Beyond the Wheel

Safety Performer offers fleet and safety managers a measurement, intervention and evaluation tool to help systematically identify why safety problems are occurring in order to provide coaching, recommend remedies and encourage corrective action(s).

The Safety Performer tool helps to make sense of the volumes of data that managers are receiving daily from multiple sources by combining this critical data all in one location. This allows stakeholders to engage proactively to prevent future events with customizable review logic and safety score pop-up's to include categories such as:

- Roll Stability Events / Forward Collision Warnings
- Vehicle Event Recording / Hard Braking
- Speed Monitoring Events
- Log Violations / Lane Departures
- Accidents / Citations

### More than Just a Scorecard

Safety Performer offers a centralized location for ALL safety events and measures them in a Per Million Miles calculation. It goes beyond the typical scorecard and can:

- Integrate your driver data with robust workflow and review processes you can customize and weight by importance.

- Furnish daily updates of FMCSA posted inspections and crashes when the event occurs with automated email notification sent to the appropriate parties.
- Separates preventable and non-preventable events to deliver a clear risk profile of the driver.
- Supply risk indicator warnings that flag drivers with crash and violation behaviors for immediate counseling.
- Analyze current and historical facts that can indicate future potential events.

### Drive Down CSA Scores

With so many moving parts surrounding new regulatory compliance, you can pair Safety Performer with TPI's HazMat Informer and PSP Performer tools for even more control over your safety program - not to mention your future CSA scores, hazardous materials handling and hiring and retention practices!

### Put Safety to the Test

Make sure your company is minding their P's and DataQ's, as well as addressing the 7 BASICS of FMCSA with Safety Performer. To learn more or to request a demo, contact TPI at **1-866-771-5003** or visit our website at [www.tpistechnology.com](http://www.tpistechnology.com)

### About TPI:

*Better data and better decisions; it's what drives us. Using original software solutions created for the transportation industry, we deliver a scorecard that helps to improve daily operations and efficiencies and your bottom line through the identification and assessment of data that drives improved decision-making. TPI is based in Phoenix, AZ., and works with clients who operate fleets both regionally and nationwide.*
